SYSTEMS ANALYST /  
JR. FRONTEND DEVELOPER

## PROFILE

Graduated on 2019, I'm a person with knowledge in software development and its methodologies. Self-Taught y passionate about web development, particularly focused on "React.js" framework. Empathic, eager to learn and face my first challenge in the software industry to grow professionally.

## EXPERIENCE

### MARVELSITE

#### WEB Application (<https://marvelsite.vercel.app>) | 2022

Made under "React" framework using the official Marvel's API. App shows a list of characters in the universe of the famous company, allows to check their detail and specifically search for the desired character.

### GUBERNAMENTAL PAGE

#### WEB Template (<https://gvtemplate.vercel.app>) | 2022

Template of a webpage for a government entity, initially made with future intentions of presenting it as a freelance project.

### SISCONV

#### Desktop Application | 2018 - 2019

As part of the final stage of my college career, I did a job in collaboration with the "Municipalidad de 28 de Noviembre", who delivered de necessary requirements to design and code a debt payment system with "JAVA".

### E.P.J.A N°6

#### Professor of "Applied computer science" | 2019 – Present

Professor of "applied computer science". Topics covered are: Computer Science and its applications – Organization of Computers – Operating Systems - Introduction to Programming.

## EDUCATION
